

Tim Justina Yeung, PhD

timjustina.com
design@timjustina.com

Product designer with 3+ years of end-to-end experience across web, mobile, and IoT platforms. Background in neuroscience research with high data fluency. Proven track record of navigating complex, undefined problems and delivering solutions.

Experience

Product Designer 2022–present

Kin Technology

- Owned redesign of web and mobile app features for an IoT medication adherence platform, improved accessibility across UX and UI.
- Drove end-to-end design of the human-machine interface, streamlined interaction flows to enable successful hardware trials.
- Owned 0-to-1 design of a caregiver-facing dashboard, defined data requirements and visualisation for actionable caregiver insights.

Laboratory Research Scientist Feb–Aug 2022

The Francis Crick Institute

- Debugged and redesigned a failing experimental system, enabling the project to proceed.
- Drove experimental design, data analysis strategy, and critical review of grant proposals and manuscripts.

Doctoral Researcher 2016–2021

The Francis Crick Institute

- Led end-to-end hypothesis-driven research uncovering novel mechanisms in a complex system.
- Published a first-author paper (shortlisted for an outstanding paper award) and presented findings at multiple international conferences.

Product Designer Jan–Mar 2019

Pons.ai

- Drove 0-to-1 design as first designer of an art marketplace app; shaped UX, defined visual direction, and delivered high-fidelity prototypes.

Education

King’s College London 2016–2022

PhD, Developmental Neurobiology

University College London 2012–2016

MSci, Neuroscience

Key Skills

Design Thinking
User Research
Qualitative Analysis
Quantitative Analysis
Usability Testing
User Flows
I.A.
Wireframing
Prototyping
Design System
Data Visualisation
Accessible Design

Core Tools
